A Definition

Vigil

A night watch or night

spent in prayer. A purpose-

ful period of surveillance to

guard and protect. The rite

of staying awake at night

for devotional purposes in

observance of the death of a

loved one or preceding a

holy feast.

The World AIDS Day committee is a group of people who share a common desire to honor the memory of those who have died and to demonstrate our love and support for those living with HIV/AIDS by reminding the world that AIDS is not over.
