

Syphilis Radio 2011

Cell phone rings

Girl: Hello.

Guy: Hey, are we still meeting up?

Girl: Uhhh, I don't know. I just found out my friend has syphilis!

Guy: Is she okay?

Girl: Yea, syphilis is treatable, so it is a good thing she got tested. If left untreated it can be fatal.

Guy: Hold up, are you saying you think I may have syphilis?

Girl: Well, have you ever been tested?

Guy: No, but I feel fine.

Girl: You still can have syphilis.

Guy: Ok, I'll get tested.

Announcer:

- Syphilis is a serious infection that spreads from person to person through direct contact with a syphilis sore and it's spreading in Escambia County.
- Symptoms may be invisible or include painless sores, body rashes, or patchy hair loss. The sores may disappear, but the disease will continue to progress.
- Syphilis can also be passed from mother to baby during pregnancy.
- **DON'T HOOK-UP WITH SYPHILIS. GET TESTED, GET TREATED.**
